

A RESOLUTION BY THE EL PASO COUNTY REPUBLICAN PARTY DENOUNCING THE INDICTMENT OF PRESIDENT DONALD J TRUMP

WHEREAS, From the moment Donald Trump announced his candidacy for the Office of President of the United States, the radical left has sought to destroy him personally and professionally;

WHEREAS, This effort has been most noticeable from the efforts of the Democrat Party both nationally and locally in places such as New York and Georgia;

WHEREAS, The Democrat controlled Congress of the United States twice impeached President Trump for fabricated and grossly exaggerated offenses that amounted to an attempted political assassination in order to prevent him from resuming public office and posing a threat to their radically un-American agenda;

WHEREAS, These and many other actions taken by radical Democrats and deep state functionaries are clear examples of our political and legal systems being coopted, perverted, and turned against the 45th President of the United States in order to secure and further their own political agendas of power, privilege, and control of American governance; and

WHEREAS, Our legal system being used to persecute President Donald Trump as well as many other American citizens whose offenses amount to nothing more than resistance to a despotic Democrat Party is both alarming and repulsive and places all Americans in peril from a rogue and tyrannical government;

BE IT RESOLVED THAT, The Republican Party of El Paso County strongly repudiates and denounces 1) the indictment of President Donald Trump, 2) the abuse of prosecutorial power by the Manhattan District Attorney, and 3) the abuse of investigatory and prosecutorial powers by the US Department of Justice to persecute the 45th President of the United States for political expedience.

BE IT FURTHER RESOLVED THAT, The Republican Party of El Paso County recognizes that the intent of these actions is to cause fear and to intimidate any American who would support Donald Trump and resist the tyranny of the Democrat Party and their adherents.
